Performance assessment is an interactive technical note that deals with evaluating co-workers performance in the business environment, as well as those management styles required to achieve better performance.

Through this technical note students will:

• Learn how to assess performance
• Get to know the assessment process
• Discover the necessary leadership styles
• Learn about different assessment situations
• Understand how to handle different profiles
A game is played in which students role-play as the CFO who has to assess the performance of four co-workers. Video interviews are included and it is from these that students will have to base their decisions. Students always gets specific information about the situation and are aware of their progression through the game.
Students receive detailed general feedback throughout the documentation and immediate feedback after each decision which details their position.
