This interactive technical note analyses the concept of Economic Value Added (EVA), and the relationship between EVA and the present value.

This interactive technical note is structured into the following parts:

- Introduction
- Value Creation
- The Economic Value Added (EVA)
- Practical Application
- Practical Exercise
Apart from the theoretical contents included in this interactive technical note, a practical application allows students to analyze different scenarios and put these into practice through a final exercise.
EVA: Economic Value Added

This documentation includes examples, reflections, tables etc.

Students can click on the tables and read detailed explanations which facilitate the understanding of the calculations.
The technical note includes a simulator of a case study in which students can explore potential situations in which EVA is used.

Students can observe the effects of changing any of the hypothesis considered in the model.
