Intranets is an interactive technical note which introduces the topic of Intranets and corporate portals, showing the advantages both for companies and employees.

The different chapters are the following:

• Overview
• Critical success factors
• Application Areas
• Examples
• Extranet
• Survey
A global overview of this communication tool is offered with the help of corporate videos about use and critical success factors in implementation processes. Although some showcases from a user's point of view are presented.
