Organizational Design is an interactive technical note which explains how an organization has to be lined up with strategy. Different animations and interactive concept models help the students to assimilate the theoretical ideas.

The different chapters are the following:

• Strategy
• Structure
• Communication and Processes
• Organizational forms
Based on Jay R. Galbraith’s Five Star Model the central navigation is based on an interactive concept map, explaining the manager’s tasks structuring the organization. The organizational forms are explained along with their dimensions.
A global overview compares the different organizational forms, their traits, pros and cons.
